**GENERAL OBJECTIVE**

Students of nursing will develop skills in applying the learning process in the care of patients in a variety of clinical settings and they develop the skill of performing various procedures in the clinical setting strictly following the related scientific principles and standards for the steps followed.

**CONTRIBUTORY OBJECTIVES**

1. Follow systematically the steps of the procedure.
2. Correlate the knowledge from other disciplines while performing the steps of the procedure.
3. Assemble all articles required for the procedure.
4. Demonstrate skill in performing the procedure accurately.
5. Identify skill in assessment planning, implementing and evaluating the Nursing care to different organs i.e. Hospital and Community.
6. Assess the learning needs of clients, plan and implement health education.
7. Develop the ability to work in a team.

**INSTRUCTION FOR THE PROCEDURE SELECTED**

1. The statements of a practical record means that the student has received instruction on Performing Procedure and also asks in recording whether the student has performed the procedure in the satisfaction or not.
2. The practical records must be entered carefully and the record sheet should be checked after every observation.
3. All procedure should be demonstrated in the classroom before they are carried out in the ward.
4. Procedure should be signed by the clinical instructor when the student has performed the procedure satisfactorily.
5. No student should be allowed to perform the procedure without demonstrating it in the classroom.
6. Procedures are to be signed after sufficient practice in the clinical area.
7. The student must take responsibility for obtaining a signature from the respective clinical instructor.
8. Evaluation of student performance should be carried out periodically.
9. A student must complete all the procedures and update the practical record at the end of each academic year.

### SEXUAL HEALTH DAY

World Sexual Health Day marks the need for an open dialogue, comprehensive sexual education, awareness campaigns, and sensible legislative support. It also emphasizes the role of families in creating an environment where children can openly discuss sexual health. By prioritizing sexual well-being, India can truly progress as a contemporary and progressive society.

Despite our strides in technology, we have overlooked the critical need to address sexual health, which encompasses three fundamental dimensions: sexual health, mental well-being and relationship dynamics.

In a recent study conducted by Quora, the Sexual Health Index was subjected to scrutiny, involving over 4,000 respondents from diverse states and cities across India, spanning an age range of 24 to 44 years. Astonishingly, despite the prevailing taboos surrounding discussions on sexual health, a staggering 50% of the respondents acknowledged that their productivity levels were obstructed to 60% or lower due to sexual health-related concerns.

In conclusion, as we entice our nation's achievements, let us not overlook that genuine progress lies in liberating ourselves from the constraints of traditionalism and embracing sexual health proactively.
